

DELIVERING BETTER, MORE SECURE SOFTWARE FASTER

CORE COMPETENCIES

- DevOps cultural transformation; Deployment Automation
- Planning, design and implementation of Continuous Delivery capabilities
- Innovation and development of Continuous Delivery enabling products
- Adoption of Agile Best Practices; Coaching, Mentoring
- Test Automation, Quality Assurance and Metrics
- Requirements Envisioning, Product Roadmaps, and creation of Requirements Backlogs
- Agile DevOps Maturity Assessments and Improvement Plans

DIFFERENTIATORS

- **Innovator of CI/CD tools** designed to accelerate the delivery of high quality software.
- **Niche, focused business** employs a team of professionals experienced in the software production life cycle, with deep knowledge in the transition to Agile, DevOps and Continuous Delivery automation.
- **Successful track record** in delivering ahead of schedule and under budget within both the DoD and Civilian Federal agencies.
- **Risk free partnership** with no vendor lock in; products and processes integrate with an organization's existing IT infrastructure without disrupting operations; current investments are safeguarded.
- **Highly customized approach** caters to the requirements unique to each federal agency.

PAST PERFORMANCE

USPTO CICM

- Built an open source platform in support of DevOps and Continuous Delivery adoption.
- Process Reengineering and Program Management support.

DISA Forge.mil

- Implemented ALM and community products to support continuous delivery automation capabilities.
- Supported over 1,000 DoD projects on every major technology available.

HHS/CMS in support of Healthcare.gov

- Developed collaboration and knowledge-base platform including document management, search, wikis, blogs, forums and user management.

COMPANY DATA

Steel Thread Software offers innovative products and services that help federal agencies produce high quality, more secure, software faster. Our teams are comprised of professionals with significant experience using modern Agile processes and open source tools to help agencies achieve their continuous delivery goals.
